🔗 Portfolio   ○ TeodoraDumitru99

Profile

Web Developer and Product Designer with hands-on experience in web applications, prototyping, and user-centered design. Passionate about crafting functional, well-designed products—ranging from physical prototypes to digital interfaces—while ensuring usability and efficiency.

Professional Experience

Junior Web Developer   10/2024 – present
Zummit Infolabs   Remote
- Developed responsive web applications using React.js and Tailwind for styling.
- Built reusable UI components to enhance development efficiency.
- Used GitHub for version control, ensuring code consistency across the team.
- Collaborated with designers to translate wireframes into functional components.

Intern UI/UX Designer   04/2024 – 10/2024
Zummit Infolabs   Remote
- Designed low-fidelity and high-fidelity wireframes for AI Automation websites.
- Created intuitive prototypes using Figma, improving usability by 20%.
- Created use cases and conducted user research, enhancing navigation by 25%.
- Collaborated with the Frontend team, achieving 100% adherence to timelines.
- Coordinated the UI/UX team in using design systems and responsive design.
- Participated in interviews for new team members.

Intern Product Designer   06/2022 – 09/2022
S.C. MUSA PITESTI S.R.L.   Pitesti
- Designed products using CAD/CAM Software.

Education

Master of Industrial Design and Innovative Products   09/2023 – present
Faculty of Industrial Engineering and Robotics, University Politehnica of Bucharest   Bucharest

Bachelor of Industrial Design   09/2019 – 07/2023
Faculty of Mechanical Engineering and Mechatronics, University Politehnica of Bucharest   Bucharest
- Received 1st place at the Scientific Communications Session.
- Academic results: Overall Grade – 9.71; Bachelor Thesis – 10.

Projects

Portfolio Website 🔗
Designed and developed a responsive web application showcasing personal projects in UI/UX Design and Web Development. Designed using React.js, Three.js, CSS3, Figma and Adobe Photoshop.

Product Design Projects 🔗
Developed a smart lamp with remote control, operable via a mobile app or automatically through integrated sensors. Additionally, developed product design solutions, including modular furniture and multifunctional storage solutions. Designed using Arduino IDE, Android Studio, CAD/CAM Software and Adobe Photoshop.

Skills

HTML5	CSS3
JavaScript	React.js
Tailwind	Bootstrap
Figma	Adobe Photoshop
Blender	CAD/CAM Software
